October 7, 2019

Sir/Maam;

Good day!

As what have been discussed on the technical meeting with the DENR-CENRO dated October 4, 2019 regarding on the outbreak of Crown-of-thorns, the removal of COT must be acted immediately as the outbreak has a high density on some diving spot in the island.

Anent thereto, we would like to invite you for our first COT removal schedule on October 11, 2019, 8 o'clock in the morning, the location is Coral Garden. Participants must attend the workshop on proper removal of COT before doing the actual removal of COT and bring fins and mask and one (1) tong and basin for a buddy pair.

The workshop is on 8 o'clock in the morning at People and the sea office, load boat will be right after the workshop. A weekly removal will be done in different site recommended by the people and the sea after coral garden. This will be our collaborative effort in conducting measures on the COT outbreak around the island and also in the monad shoal.

Anticipating your good response for this endeavor.

Sincerely,

MAMERTO Q. RODRIGO
MENRO
